Tests/Quizzes/Writing Assignments (TQW)

T	T	Q	W	W	Q	T	T	Q	Q
70	70	100	90	90	70	75	75	70	0
Q	Q	Q	W	W	W	W	Q	T	T
90	90	100	80	80	80	70	40	80	80

$$\frac{\text{Total Points}}{1,500} \div \frac{\text{Number of Assignments}}{20} = \text{Average } 75$$

Average X .75 = Points toward your grade.

$$75 \cdot .75 = \underline{\underline{56.25 \text{ points out of 100.}}}$$

Note: If CW/HW were not 25% of grade, this student would earn a 75 average for the quarter.

Classwork/Homework Assignments (CW/HW)

100	100	100	100	100	100	100	150	100	100

50	100	100	75	75	100	100	150	100	100

$$\frac{\text{Total Points}}{2,000} \div \frac{\text{Number of Assignments}}{20} = \text{Average } 100$$

Average X .25 = Points toward your grade.

$$100 \times .25 = \underline{25 \text{ points out of 100.}}$$

Senior English Grading Policy – Mr. Grenier

Test/Quizzes/Writing (TQW) = 56.25

Classwork/Homework (CW/HW) = 25.00

Reward System

1. Write down assignments in agenda (or notebook) daily and your lowest TQW grade will be dropped.
2. If you complete 90% of your classwork/homework, your lowest TQW grade will be dropped.
3. There will be two extra credit assignments per quarter worth (up to) 50 points. These points will be applied toward your TQW grade.
4. If you volunteer to read in class, you will earn 5 points each time. These points will be applied to your TQW grade.

Senior English Grading Policy – Mr. Grenier

If this student keeps an agenda, their grade would improve to:

$$\frac{\text{Total Points}}{1,500} \div \frac{\text{Number of Assignments}}{19 \text{ (dropped one grade)}} = \text{Average } 79$$

$$79 \times .75 = \underline{59.25 \text{ (TQW)} + 25 \text{ (HW/CW)} = 84}$$

If this student does 90% of the homework, their grade would improve to:

$$\frac{\text{Total Points}}{1,500} \div \frac{\text{Number of Assignments}}{18 \text{ (dropped one grade)}} = \text{Average } 83$$

$$83 \times .75 = \underline{62.25 \text{ (TQW)} + 25 \text{ (HW/CW)} = 87.25}$$

Senior English Grading Policy – Mr. Grenier

If this student completes two extra credit assignments (50 points each), their grade would improve to:

$$\frac{\text{Total Points}}{1,600} \div \frac{\text{Number of Assignments}}{18 \text{ (dropped one grade)}} = \text{Average } 89$$

$$89 \times .75 = 66.75 \text{ (TQW)} + 25 \text{ (HW/CW)} = 91.75$$

If this student volunteers to read 10 times in class (5 points per class), their grade would improve to:

$$\frac{\text{Total Points}}{1,650} \div \frac{\text{Number of Assignments}}{18 \text{ (dropped one grade)}} = \text{Average } 92$$

$$92 \times .75 = 69 \text{ (TQW)} + 25 \text{ (HW/CW)} = 94$$
